

- ✓ Mill with mixer able to prepare 1.000 kg of feed per hour ;
- ✓ Needs only 3m x 1m of space;
- ✓ Very easy to manage, by means of a flexible pipe in a radius within 8m able to pick up the wheat held in pile or in a silo;
- ✓ You may connect 3 pipes, so the work is easier and continuous ;
- ✓ The mill and the mixer are not connected and can be used independently ;
- ✓ The electronic scale applied indicates the quantity of the feed with an accuracy of 1 kg.;
- ✓ Recovery system of the powders filtered;
- ✓ The structure of the machine is very simple and requires only minimal maintenance;
- ✓ All operations are run by two electric motors.
