

Nipple drinking line, with drip-catcher and anti-perching aluminium bar.

Broilers feed pan

# **AGRITECH**

## **POULTRY DIVISION**

**Agritech, after reaching top results in the manufacturing of fibreglass silos for feed storage, has now expanded its activity and provides the complete equipment for broiler houses. Modern feeding and drinking systems, heating and ventilation.**

**Agritech feed-pans, made in special plastic material resistant against chemical products, thanks their adjuster device, dispense the feed accurately. The spill-proof edge avoids feed waste.**

**Agritech's nipple drinking system, in stainless steel and plastic, provides the best solution since the beginning of animal life, the drip-cup helps the farmer to keep the floor dry.**

**Ventilation and cooling systems along with heating systems, studied to fit to the most different climate conditions, complete our range of products in order to supply modern farmers with customised turnkey installations.**

**Agritech sales department stays at disposal for quotations on customer's request.**
